	APPENDIX	20

I. HIGHLIGHTS

*New Hampshire's economy is stabilizing as the number of people who are unemployed continues to hold in the mid to low 20,000's during the first part of 1984.

*Total population is expected to expand by 77,790 or 8.4 percent over the 1980 census, with a projection of 998,400 for FY 1985.

*The civilian labor force will continue to expand with the majority of the growth in the two southeastern counties.

*The civilian labor force is projected to reach 525,400 in FY 1985 which is a 15.6 percent increase over the 1980 census.

*Unemployment rates are expected to average around 5.5 percent for FY 1985. Coos and Carroll counties are expected to be the highest with 8.4 percent and 7.1 percent unemployment rates respectively.

*The total number of individuals who will actually incur a period of unemployment in FY 1985 is projected to reach 99,220. The average number of long-term unemployed (15 weeks or more) persons are expected to reach 7,190 for FY 1985.

*The number of economically disadvantaged is estimated at 87,025 which is a 15.5 percent increase over the 1980 census.

*Manpower services will be needed by persons lacking in employable skills, laid off due to industry wide closings who will require retraining in order to become employed, lack of work experience or educational requirements. These problems can be further hindered by geographic and transportation problems. In some areas employment is of a seasonal nature, as in the northern part of the state where some workers are required to have two skills in order to be gainfully employed throughout the year.

II. Description of Area

The State of New Hampshire is one of six New England States in the Northeastern part of the United States. Under CETA in FY 1983 there were two CETA Prime Sponsors in the State with Hillsborough County as one Prime Sponsor and the remaining nine counties comprising the Balance of State as the other Prime Sponsor and they were administered by the New Hampshire Office of Employment and Training. Beginning in FY 1984 there was only one service delivery area , the State of New Hampshire, as designated by the Governor. For Fiscal Year 1985 two service delivery areas are planned similar to what existed in FY 1983.

New Hampshire shares its boundaries with the Province of Quebec to the north, the Connecticut River and the State of Vermont to the west, the State of Massachusetts to the south and the State of Maine and the Atlantic Ocean to the east. The State has seventeen miles of coastline along the Atlantic Ocean.

The average elevation in New Hampshire is 2,000 feet and approximately 84 percent of its 9,241 square miles is covered by forests. The southern section of the State consisting of Hillsborough, Merrimack, Rockingham and Strafford counties contains over seventy percent of the State's population.

The mountains in the north, the seacoast in the east and the many lakes and ponds through the state are all within easy reach from Concord, the State's capital. Concord is readily accessible from various Northeast major cities. Listed below are highway distances:

From:	To Concord:
Boston	70 miles
Montreal	240 miles
New Haven	174 miles
New York	250 miles
Portland	87 miles
Providence	110 miles

a) Economic Trends

The economic condition in New Hampshire is continuing to stabilize. Table 26 indicates that for per capita personal income growth between 1981 and 1982 New Hampshire is almost two percentage points ahead of the national average. When compared to New England, the state is four-tenths of a percentage point behind but still ranked fourth among the New England States.

Total personal income growth from 1981 to 1982 for New Hampshire was higher than the national or New England averages, although all averages have dropped significantly since last year. Table 27 illustrates this point, as well as the fact that New Hampshire is again ranked number one in percentage change from 1981 to 1982 with an 8.3 percent change for total personal income in New England.

The following tabulation of total wages serves to show the changing pattern in the share of industry between manufacturing and nonmanufacturing. Manufacturing reached its lowest level in twelve years in 1982 with only 40.0 percent of the total wages. Preliminary third quarter figures for 1983 continue to indicate the downward slide for manufacturing.

Total Wages
New Hampshire
(Workers Covered by Unemployment
Compensation in Private Industry)

Year	Total	Manufacturing	Non-manufacturing	Percent of Total Mfg.	Non-mfg.
1972	$1,543,947,639	$682,756,348	$861,191,291	44.2	55.8
1973	1,764,794,646	764,904,559	999,890,087	43.3	56.7
1974	1,912,311,974	815,835,934	096,476,040	42.7	57.3
1975	1,959,164,661	801,425,796	157,738,865	40.9	59.1
1976	2,260,558,803	950,208,803	1,310,350,000	42.0	58.0
1977	2,587,126,913	1,096,181,639	1,490,945,274	42.4	57.6
1978	3,041,007,264	1,281,209,453	1,759,797,804	42.1	57.9
1979	3,537,373,910	1,496,782,374	2,040,591,536	42.3	57.7
1980	3,957,283,436	1,684,829,094	2,272,454,342	42.6	57.4
1981	4,432,106,831	1,848,281,022	2,583,825,809	41.7	58.3
1982	4,846,866,740	1,941,164,597	2,905,702,143	40.0	60.0

III. Labor Force and Population Demographics (Tables 1 - 6)

Population in New Hampshire is expected to reach 998,400 during Fiscal Year 1985.

During the ten year period between the 1970 and 1980 census years population increased an average of 2.5 percent annually. The annual gain from the 1980 census to FY 1985 is about 2.1 percent.

The males share of the population, as well as the females share, remained the same at 48.5 and 51.5 percent, respectively when compared to FY 1984.

Those individuals 65 years and older total 116,092 representing 11.6 percent of the population in 1985. The largest age group in the state is the 25-39 year olds with a total of 260,375. This represents 26.1 percent of the 1985 population.

The civilian labor force is expected to reach 525,400 in FY 1985, an increase of 15.6 percent over the 1980 census labor force. From 1980 the female civilian labor force increased by 23.0 percent while the male labor force increased by 9.9 percent.

The age group 25-34 year olds is expected to have the largest percentage of the labor force with 29.1 percent of the total. The labor force paticipation rate rose three-tenths of a percentage point to 68.3 percent over 1984 estimates. The anticipated participation rate is an increase of three percentage points from 1980 to 1985.

More job opportunities continue to become available for the female worker during this decade than they have in the past. Some factors for the increase in the female participation rate are more employer flexibility for hours and benefits, including a mother's shift, large shopping malls with the various shifts to cover the hours of operation and the increase in the level of educational attainment allowing women to be more qualified for a greater variety of work.

IV. Industrial Employment (Tables 8 - 13)

Annual average of nonagricultural employment reached 412,600 in 1983, an increase of 13,700 from 1982. The goods-producing industries fell 1.7 percentage points of the total nonagricultural wage and salary employment from 1980. Manufacturing lost 2.5 percentage points while construction and mining gained eight-tenths of a percentage point. The service-producing industries recorded employment gains in all industries, except government, from 1980. Services and other accounted for the greatest increase with 2.0 percentage points over 1980.

Changes in industry percentages followed a similar trend when comparing New Hampshire figures with those of the United States.

The following table shows the relationship of New Hampshire with the United States and the other New England States in February 1984:

Employees on Nonagricultural and Manufacturing Payrolls by Area (in Thousands)

Area	Total Nonagricultural	Manufacturing	Percent of Total
United States	91133.0	19307.0	21.2
New England	5539.4	1439.9	26.0
Connecticut	1447.4	411.1	28.4
Maine	411.6	109.2	26.5
Massachusetts	2664.6	636.7	23.9
New Hampshire	413.8	117.5	28.4
Rhode Island	396.2	117.7	29.7
Vermont	205.8	47.7	23.2

SOURCE: U.S. Department of Labor, Bureau of Labor Statistics, Boston, Massachusetts, May 1984.

New Hampshire's manufacturing percentage of the total nonagricultural employees as of February 1984 was above the United States and New England percentages, as it has been for the past few years. In the New England area, Rhode Island leads with 29.7 percent as it did last year. Connecticut and New Hampshire are tied for second with 28.4 percent. Only two New England states had an increase in manufacturing employment, Maine and Massachusetts, to follow the trend established in the United States and New England. Except for Rhode Island, which remained the same, all the other New England states recorded a minor drop in manufacturing employment. The time period of 1970 through to February 1984, shows the following trend:

Percent

Manufacturing to Nonagricultural Employment

Area	1970	1975	1980	February 1984
U.S.	27.3	23.7	22.1	21.2
N.E.	27.2	27.2	27.8	26.0
N.H.	35.4	28.3	29.8	28.4

New Hampshire continues to maintain a greater proportion of manufacturing than the New England States as a whole.

The following table shows the relationship of New Hampshire with the United States and the other New England States according to durable and nondurable goods in February 1984:

Employees on Durable and Nondurable Manufacturing Payrolls by Area (in Thousands)

Area	Durable Goods	Nondurable Goods
United States	11469.0	7838.0
New England	959.6	480.3
Connecticut	307.4	103.7
Maine	41.6	67.6
Massachusetts	420.6	216.1
New Hampshire	76.2	41.3
Rhode Island	79.7	38.0
Vermont	34.1	13.6

SOURCE: U.S. Department of Labor, Bureau of Labor Statistics, Boston, Massachusetts, May 1984

The employment in the durable goods industries accounted for 66.6 percent of the employment in the manufacturing industries in New England. Maine was the only state where the employment in durable goods was less than sixty percent of the manufacturing employment. New Hampshire with 64.9 percent of the manufacturing employment in durable goods was fifth in New England.

Electrical products with 21,700 workers is the leading industry in manufacturing in New Hampshire followed very closely by machinery with 21,600 workers. In 1983 durable goods with 72,400 workers had 64.0 percent whereas nondurable goods with 40,650 workers had 36.0 percent of all manufacturing (see Table 9).

Comparative growth of manufacturing employment in New Hampshire and the United States is shown in the following table:

Growth in Manufacuring Industries
New Hampshire and the United States
(in Thousands)

	New Hampshire		United States*	
Year	Average Employment	Percent Change	Average Employment	Percent Change
1972	90.8	5.2	19,151	2.8
1973	96.0	5.7	20,154	5.2
1974	94.2	-1.9	20,077	-0.4
1975	85.1	-10.7	18,323	-9.6
1976	94.5	11.0	18,997	3.7
1977	101.5	7.4	19,682	3.6
1978	109.8	8.3	20,505	4.2
1979	116.5	6.1	21,040	2.6
1980	116.6	.5	20,285	3.6
1981	116.6	0.0	20,170	-.6
1982	112.0	-3.8	18,853	-6.5
1983	113.0	0.9	18,678	-0.9

*SOURCE: Employment and Earnings, March 1984 Vol. 31, No. 3, Table B-1, pg. 47.

The overall growth in the manufacturing industries for the period 1972-1983 shows New Hampshire increasing at a rate nearly six times the national rate (24.4 to 4.2 percent). The employment declines during the recession of 1974-1975 were considerably steeper statewide than nationwide, while during the recession of 1981-1982 the decline was steeper nationwide than statewide. New Hampshire weathered the last recession better due to our diversified economy.

Growth in trade and services, as shown in the following table, recorded the largest percent change since 1978. The overall growth in New Hampshire for the decade 1974 through 1983 was 51.5 percent compared with the nationwide rate of 32.1 percent. Since the year 1975, the state has exceeded the nation in the growth of the trade and service industries.

Growth in Trade and Services
New Hampshire and the United States
(in Thousands)

	New Hampshire		United States*	
Year	Average Employment	Percent Change	Average Employment	Percent Change
1972	105.9	6.9	28,225	4.0
1973	114.7	8.3	29,464	4.4
1974	117.8	2.8	30,428	3.2
1975	120.3	2.1	30,952	1.7
1976	127.2	5.7	32,306	4.4
1977	136.0	7.0	33,819	4.7
1978	145.5	7.0	35,794	5.8
1979	153.1	5.2	37,304	4.2
1980	157.9	3.1	38,200	2.4
1981	165.6	4.9	39,166	2.5
1982	168.0	1.4	39,465	0.8
1983	178.5	6.3	40,193	1.8

V. Employment Information by Occupation (Tables 28-29)

Sales workers are projected to have the largest annual growth rate with 4.7 percent followed by Service workers with a rate of 4.3 over the period 1981-1991. The average rate of growth for all workers is 3.8 percent. The lowest growth rate is 3.0 percent which is found among the laborers and unskilled workers.

The following table shows the nineteen occupations that have a growth rate of 6.0 percent or better which is considerably higher than the average of 3.7 percent.

Occupations with Annual Growth Rates of
6.0 Percent or Better

Peripheral Equipment EDP Operators	8.2
Coil Finishers	8.1
Electrical/Electronic Assemblers	7.3
Investigators, Insurance	7.2
Coil Winders	7.1
Child Care Attendants	7.1
Plater Helpers	7.0
Sales Agents, Insurance	7.0
Electrical/Electronics Technicians	6.9
Electroplaters	6.7
Child Care Workers	6.7
Social Service Sides	6.5
Data Processing Machine Repairers	6.5
Worksheet Clerks	6.4
Testers	6.2
Mechanics, Aircraft	6.1
Dieticians/Nutritionists	6.0
Proof Machine Operators	6.0
Survey Workers	6.0

Note: Restricted to occupations with employment of 100 or more in 1981.

The fifteen specific occupations offering the greatest number of annual job openings by growth are listed below by order of rank:

Fifteen Occupations Projected to Have the Greatest Numerical Growth

Occupation	Annual Growth
Sales Clerk	531
Sales Representative, Agents or Associates	485
Electrical/Electronic Assemblers	483
Waiters/Waitresses	474
Secretaries	382
Cashiers	372
General Clerks, Office	363
Nurses, Professional	293
Managers, Store	237
Nurses Aides/Orderlies	222
Food Preparation and Service Workers, Fast Food	215
Electrical/Electronic Technicians	210
Kitchen Helpers	193
Supervisors, Nonworking (ex. services)	188
Truck Drivers, Heavy	177

VI. Unemployment Information

a) Trends in Unemployment (Tables 6-7, 21-22)

Annual average unemployment for the state in 1983 was 27,000 with an unemployment rate of 5.4 percent. New Hampshire was tied with South Dakota for the lowest rate by state. Projected unemployment for FY 1985 is 29,058 with an unemployment rate of 5.5 percent. The expected stability of the economy through 1984 and parts of 1985 should keep the unemployment rate at approximately the 1983 levels.

Table 7 represents another view of the projected unemployment. An estimated 99,220 individuals will experience unemployment during some point of FY 1985.

Of the 99,220 unemployed workers, males will account for 54.3 percent and females will account for the remainder of 45.7 percent. The number of long-term unemployed is expected to reach 7,190 with males accounting for 66.5 percent. Hillsborough and Rockingham Counties are projected to account for 46.6 percent of the long-term unemployed.

New Hampshire exhaustees in the first quarter of 1984 (Table 22) totaled 1,208 with 745 or 61.7 percent male. Hillsborough, Rockingham and Strafford Counties accounted for fifty-two percent of the exhaustees in the first quarter of 1984.

Approximately twenty-five percent of the exhaustees received weekly benefits of $126 or more. Table 21 shows the breakdown by state and counties.

b) Insured Unemployed (Tables 23-25)

The data on insured unemployment are based on information as of April 1984.

The total insured unemployed in the state dropped to 5,474 of which 3,658 or 66.8 percent were male. The manufacturing industries accounted for 30.9 percent with the nonmanufacturing industries being assessed the remainder of 69.1 percent. Comparing the male-female percentage of unemployed in manufacturing reveals a nearly equal division. The same comparison in nonmanufacturing shows that male unemployed comprises 75.0 percent with the majority of that occurring in construction and mining. Some of this represents layoffs at the Seabrook Nuclear Plant and some layoffs of construction workers awaiting the usual pickup in construction employment in the spring months.

Table 24 shows that by major occupational classification, structural at 33.4 percent and benchwork at 13.3 percent made up 46.7 percent of all insured unemployed in April 1984. Almost forty percent of the total were unemployed for one to two weeks. Seasonal layoffs of construction workers results in a higher proportion of workers from this industry division in the winter months.

The age group of 25-34 year olds has 1,996 insured unemployed which is 36.5 percent of the total. The same age group for the women accounted for 34.1 percent of the total female unemployed.

c) Employment Service Job Openings

A total of 11,570 job openings were received by the New Hampshire Job Service during the first six months of FY 1984. During this period the Employment Service Section of the Department of Employment Security successfully placed 5,987 applicants with a placement ratio of 51.7 percent. Approximately 55 percent of job openings received were in clerical, services and structural occupations. Benchwork and structural placement ratios were the highest while professional, technical and managerial applicants were the most difficult to place with a ratio of 29.4 percent.

New Hampshire Job Openings
Received and Filled

October 1, 1983 - March 31, 1984

Occupational Category	Openings Received	Openings Filled	Percent Filled
Professional, Technical, Managerial	649	191	29.4
Clerical	2,254	1,052	46.7
Sales	877	437	49.8
Services (including domestics)	2,533	1,299	51.3
Fish, Farm, Forestry	166	63	38.0
Processing	256	134	52.3
Machine Trades	1,165	568	48.8
Benchwork	919	620	67.5
Structural	1,536	923	60.1
Miscellaneous	1,215	700	57.6
Total	11,570	5,987	51.7

Source: ESARS Table A07

The following table shows the relationship between Active Applicants and Openings Received for the quarter ending March 31, 1984 in New Hampshire. The professional, technical and managerial group had the highest applicant per opening ratio with 5.4 while the services group had the lowest ratio with 1.4. The state average was 2.3 applicants per opening.

Occupational Group	Active Applicants	Openings Received	Applicants Per Opening
Prof., Tech. & Mgr.	1,722	320	5.4
Clerical	2,403	1,167	2.1
Sales	680	398	1.7
Services (including domestics)	2,193	1,537	1.4
Fish, Farm, Forestry	204	108	1.9
Processing	307	150	2.0
Machine Trades	1,324	598	2.2
Benchwork	1,112	547	2.0
Structural	2,854	649	4.4
Miscellaneous	1,488	615	2.4
Total	14,287	6,089	2.3

Source: ESARS Table 10, A96

VII. Estimates of Needs for Manpower Services (Tables 7, 14-18)

Manpower services will be of prime importance to unemployed workers, especially the long term or hard core unemployed individuals, those employed part-time for economic reasons, the youth group and the poor or economically disadvantaged.

It is estimated that 99,220 individuals will be unemployed at some time during Fiscal Year 1985 of which 7,190 will be unemployed for fifteen weeks or more. Many of these individuals will require help in securing employment, help in retraining for a different skill in order to rejoin the labor market. Females make up 45.7 percent of the total unemployed but only 33.5 percent of the long-term unemployed. These figures are down when compared to last year.

Manpower services will be needed by the economically disadvantaged to help alleviate their generally depressed circumstances. There will be an estimated 87,025 poor persons during FY 1985. Individuals less than 18 years old account for approximately 28 percent of the total population of the state and their share of the economically disadvantaged is 33 percent. Persons receiving welfare assistance declined by 525 or 1.6 percent over the prior year.

Persons employed part-time for economic reasons are another group that needs special attention. Some of the cause for individuals working on a part-time basis are material shortages, slack work, the inability to find full time work and lack of transportation to be able to enlarge their job hunting geographical area. Females comprise 47.7 percent of the total employment while their share of the part-time employed rises to 57.5 percent due to the fact that there are more part-time jobs for females than males.

The youth group is usually considered to be the one most in need of manpower services. The following table shows the employment, unemployment and the unemployment rate of the 16-21 year olds that make up the youth group.

New Hampshire Employment and Unemployment
For Youth 16-21 Year Olds
April 1984

Area	Labor Force	Employment	Unemployment	Unemployment Rate
New Hampshire	66,061	61,190	4,871	7.4
Belknap	2,462	2,225	237	9.6
Carroll	1,247	1,044	203	16.3
Cheshire	4,012	3,744	268	6.7
Coos	1,841	1,322	519	28.2
Grafton	4,256	3,880	376	8.8
Hillsborough	21,202	20,128	1,074	5.1
Merrimack	6,349	5,884	465	7.3
Rockingham	16,595	15,670	925	5.6
Strafford	5,934	5,377	557	9.4
Sullivan	2,163	1,916	247	11.4
Balance of State	44,859	41,062	3,797	8.5

Some of the possible causes for the unemployment rates on the the chart on the previous page are: the lack of educational levels required, lack of employable skills and experience and little know-how in the details of job search or preparation for job interviews. Assistance is also needed in determining the labor market situations by industry and area together with being furnished information concerning prevailing wage and rate and job requirements. There is a tendency on the part of the youth group to leave and re-enter the labor force more often than the older age groups.

New Hampshire having a greater percentage of rural environment than many other states, has transportation and geographic problems which are accentuated, especially in the northern counties.

GLOSSARY

Annual Average The aggregate of 12 months data divided by 12. Annual Average date are commonly used for projections and other long-term analyses.

Applicant A person who contacts a local office of the Department of Employment Security to seek employment or obtain employability development services.

Average Hourly Earnings Average weekly earnings divided by average weekly hours.

Average Weekly Earnings Average total money earnings of production or non-supervisory workers in the survey week, including overtime and incentive pay.

Average Weekly Hours Average total hours worked by production and nonsupervisory workers in the survey week, including overtime, paid vacation and sick leave.

Balance of State New Hampshire minus Hillsborough County.

Benchmark Most economic time series utilize a sample trend made of the best available data at the time. Periodically the series are adjusted due to more complete information being available. This periodic adjustment is a Benchmark Revision and the point-in-time for which the more complete data was available is the Benchmark Date. Data is commonly referenced by their benchmark data, e.g., "data based on a March 1983, benchmark."

Civilian Labor Force See Labor Force.

Consumer Price Index (CPI) This index is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI is based on prices of food, clothing, shelter and fuels, transportation fares, charges for doctors' and dentists' services, drugs and other goods and services that people buy for day to day living.

Covered Employment Employment in an industry that falls under the coverage of the respective state's unemployment insurance program. In most states presently only agriculture, the self-employed, some employed students, religious organizations, full commissioned salesmen and elected and appointed officials have significant numbers of noncovered workers.

Current Employment Statistics (CES) Estimates of nonagricultural wage and salary employment and production worker hours and earnings by industry. ES produces these estimates monthly for each state and SMSA from a sample of employing establishments in cooperation with the Bureau of Labor Statistics.

Current Population Survey (CPS) A monthly household survey of the population of the United States. This survey is the data source for the national estimates of labor force composition. Some CPS data is also incorporated into the state and area labor force estimating procedures to improve interstate comparability.

Definitions (1) Manchester LMA - City of Manchester and the towns of Auburn, Bedford, Candia, Chester, Derry, Goffstown, Hooksett, Londonderry, New Boston, Raymond and Weare.

(2) Nashua LMA - City of Nashua and the towns of Amherst, Brookline, Greenville, Hollis, Hudson, Litchfield, Lyndeboro, Mason, Merrimack, Milford, Mont Vernon, New Ipswich, Pelham, Temple and Wilton.

(3) N.H. Portion - Lawrence-Haverhill SMSA - Atkinson, Hampstead, Kingston, Newton, Plaistow, Salem and Windham.

Note: LMA Represents Labor Market Area and SMSA Represents Standard Metropolitan Statistical Area.

Discouraged Worker Persons who want work but made no attempt to find work in the past 4 weeks because of a belief that they could not find employment. Discouraged workers are not counted among the unemployed.

DOT Codes An occupational coding structure based upon job traits and relationships. The codes are published in the Dictionary of Occupational Titles.

Economically Disadvantaged An individual whose immediate family either receives cash welfare payments or whose annual income falls below the current Poverty Income Guidelines.

Educational Attainment Highest grade of school completed.

Employment by Place of Residence An estimate of the number of persons employed who live within a given labor market or other geographic area. All persons who worked for pay and unpaid family workers who worked at least 15 hours or more in the survey week are included, as are workers who were temporarily absent from their job due to vacations, labor disputes, etc.

Employment by Place of Work An estimate of the number of jobs filled in the survey week within a given area. Multiple job holders are counted for each job. In most states only the nonagricultural wage and salary workers are tallied by place of work. Labor disputants are not included in the estimates of employment by place of work.

Employment Security Automated Reporting System (ESARS) A computerized tally of all Job Service activities, job applicant and job openings characteristics.

Entry Level Job A beginning job that requires little or no experience, but may require a minimum amount of training or education for a specific position.

Hard-to-Fill Job Openings Job openings which have gone unfilled for a month or more. Some of the openings may be difficult to fill because of the job environment, wage scales or lack of qualified workers.

Hard-to-Place Applicant An applicant who is unable to be placed in a job due to (1) a lack of demand or (2) a lack of qualifications for a particular job.

High Demand Occupation Occupations which have a substantial number of job openings both in absolute terms and relative to the number of job applicants for that occupation. High demand may be the result of either high growth, high turnover and sometimes by a combination of the two.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South America, or other Spanish culture or origin regardless of race.

Index or Index Number A measure of relative growth compared with a base figure of the same time series. In index form the base period is set equal to 100, and data for other periods are expressed as percentages of the base value. Plural is indices.

Insured Unemployment A count of persons who have filed claims for state unemployment insurance benefits.

Insured Unemployment Rate An administrative tool which is the ratio of insured unemployment to covered employment lagged about 6-9 months.

Job Bank A computerized system which provides rapid dissemination of job orders throughout a network of Employment Division local offices.

Job Corps A national system of 60 residential centers in 31 states and Puerto Rico providing basic education, vocational training, counseling, health care, and other services to help disadvantaged young men and women, age 16 through 21, prepare for jobs and responsible citizenship.

Job Training Partnership Act (J+PA) an act which replaces the Comprehensive Employment and Training Act, effective 10/1/83. This act provides a new program and delivery system to train economically disadvantage persons and others for permanent private sector employment. The training programs will be administered by the State and planned and carried out through a partnership between the private sector and government at the local level. Programs include adult and youth training, training and placement assistance for dislocated workers and federal administered activities including programs for Native Americans, migrant and seasonal farm workers, veterans, labor market information, job Corps., and other national activities.

Labor Force All persons 16 years and older who are either employed or unemployed. Normally published as a civilian labor force by place of residence (See Employment by Residence).

Labor Market Area An area with a central community and economic concentration in which workers can generally change jobs without changing their residence. In most states labor market areas are either counties or groups of counties.

Labor Market Information(LMI) Data on a broad range of topics such as labor force, employment by industry, and occupation, unemployment, population, earnings, wages, hours worked, training programs and labor turnover.

Labor Turnover Movement of workers in and out of employment in a given time period in an industry, occupation or firm.

Medical Experience Directed Into Health Careers (MEDIHC) A program assisting veterans who want to pursue a health career in civilian life. Any veteran seeking a civilian health career or employer seeking qualified personnel in the health field may contact the Veteran's Representative at the nearest state Employment Service Office.

Metropolitan Statistical Area(MSA) Except in the New England States, MSAs consist of counties or groups of contiguous counties which meet specifications of social and economic integration with a central city of at least 50,000 population, or an urbanized area of at least 50,000, and a total metropolitan area population of at least 100,000. In New England States, MSAs consist of towns or cities rather than counties.

Minority Group All races other than white, and the Spanish-American ethnic group.

Multiple Job Holders Persons who simultaneously work more than one job.

Nonagricultural Wage and Salary Employment Place of work employment that does not include the selfemployed, unpaid family workers, domestics or agricultural workers. Conceptually this is probably the most consistent economic time series available to compare different labor markets over an extended period of time.

Non White Group All persons who identified themselves as Negro, American Indian, Chinese, Japanese, Filipino, Korean, or other races in response to survey or census questions.

Occupational Employment Statistics (OES) A program which produces occupational data for major industries once every three years. Projections by occupation are made which aid educators and other occupational planners.

Part-time Work Work that is less than 35 hours per week.

Per Capita Income Total personal income divided by total popluation.

Personal Income, Total Private and government wage and salary payments in cash and in kind, other labor income, farm and nonfarm proprietors' income, interest, net rents, dividends and transfer payments, less personal contributions for social insurance. It is measured before the deduction of personal income and other personal taxes. Dollars are not adjusted for change in consumer price index.

Qualified Applicant An applicant who meets education, experience, and performance standards for a job opening. These standards are set by the employer.

Seasonal Adjustments Minimizes the changes in any time series from normal annual occurrences, such as Christmas, summer vacations and weather. After seasonal adjustment any month can be compared with the annual average, or any other month and differences should then be due to economic trends or unusual occurrences. Seasonally adjusted data more accurately portrays underlying economic trends, but should not be used where the current level is more important to the data user than the economic trend. No meaningful seasonal adjustment exists for annual or annual average data since the purpose is to make monthly or quarterly data comparable to the annual average data.

SIC Codes Standard Industrial Classification code structure in which all establishments are classified by a four-digit code according to their primary economic activity. Frequently references will be made to SIC codes at the 1, 2, or 3 digit levels when a less specific classification is useful.

Survey Week The week that includes the 12th of the month is used as a reference period for most labor force data.

Time Series A set of consistent economic quantitative data collected at periodic intervals (most labor market information is monthly, but weekly and annual data is published for some items).

Total Employment A count of persons, residing in an area, who worked for pay or profit during the reference week including the 12th of the month or had a job from which they were temporarily absent because of illness, vacation, labor dispute, or other reasons not reflecting a shortage of work, or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family.

Total Unemployment A count of persons, residing in an area, who did no work at all during the reference week including the 12th of the month, but were seeking work or awaiting recall from layoffs or the beginning of a new job within the next 30 days. This count includes persons receiving unemployment insurance benefits, those who have delayed filing for benefits but were not eligible to receive them, those unemployed who have applied for benefits but were not eligible to receive them, unemployed workers who exhausted benefits in the current benefit year, unemployed workers from industries not covered by unemployed insurance, and unemployed persons newly entering or reentering the labor force.

Types of Unemployment

Frictional - Unemployment that is frictional in nature i.e., short-term unemployment encountered in searching for a job, or from a temporary layoff.

Structural - Unemployment that is structural in nature i.e., a mismatch between the skill requirements or existing job openings and the skills possessed by the current unemployed.

Cyclical - Unemployment that is cyclical in nature i.e., deficiencies in aggregate demand exist resulting in a level of labor demand that falls short of the available supply of workers.

Underemployment A term that includes both persons who are working part-time who would prefer full-time work, and persons working full-time in an occupation which does not utilize their skills derived from prior training or experience.

Unemployment Persons who were not employed during the monthly survey week but were available for work and had either (1) overtly engaged in a job-seeking activity within the four week period up to and including the survey week; (2) Were waiting to be recalled from a layoff; or (3) were waiting to report to a new wage and salary job within 30 days.

Unemployment Rate The number of unemployed persons expressed as a percentage of the labor force. Commonly the seasonally adjusted unemployment rate referred to as the unemployment rate and it is usually the only rate quoted in the monthly news release on the U.S. unemployment situation (see Seasonal Adjustment).

Vietnam Era Veteran (VEV) Any person who served on active duty for a period of more than 180 days, any part of which occurred between August 5, 1964, and May 7, 1975, and was discharged or released with other than a dishonorable discharge; or was discharged or released from active duty for a service-connected disability if any part of such duty was performed between these dates.

Work Incentive Program (WIN) Counseling, training, job development and supportive services are provided to employable recipients of Aid-to-Families-with-Dependent-Children (AFDC). The object is to place AFDC recipients into suitable employment.
